

Aluminium Peel Rivets

The Peel Rivet is a suitable option for joining soft materials such as wood, plastics and rubber. Rather than deforming the rivet body, the mandrel cuts the rivet body to form load spreading petals on the blind side.

Material: Body: 5056 Aluminium Finish: Body: Polished Mandrel: Steel

All diagrams and drawings are intended for illustration and measurement purposes only. Dimensions and specifications may change without prior notice. Please refer to your distributor for the most up-to-date data sheet. The test data presented offers approximate average strength values based on multiple tests conducted in various materials and thicknesses. For applications requiring precise strength figures or when the applied load approaches the published values, we strongly recommend conducting tests specific to your use case.
