

Rivtec® 800 Series

Pneumatic Rivet-Nut Tool for STEEL only

The Rivtec® 800 Series are a simple and proven entry level pistol grip tool for setting STEEL rivet nuts only. There are five models (801, 802, 803, 804 & 808) each with different gearing and out put speed. The tools work on the stall principle (no clutch). Each model is optimal for just two sizes of rivet nuts (808 for M12 only)

Setting Capacity

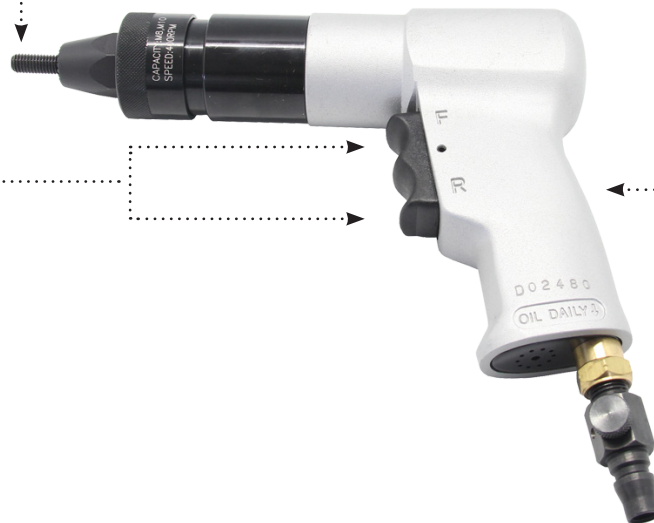

* M10 subject to air pressure availability

Industry standard socket head cap screw mandrel

Rapid setting cycle with forward/reverse (F/R) trigger for optimum user control

Nose Assemblies for M5, M6 and M8 Rivstud Series also available

Durable steel/alloy body

Optional regulator for air flow control, ideal for increasing or decreasing pressure to the tool.
